In presenting to you my 1926 Catalogue, I have listed only such varieties as I know from personal observation and tests to be worthy of a place in your garden.

Each year I test out many new creations, discarding all that are not up to the standard established by me to have a place in my catalogue.

THE PICK O' THE DAHLIAS

The descriptions are as accurate as is possible to describe a Dahlia, but some allowance must be made for climatic conditions and situation.

As to stock: I know of very few growers who harvest their tubers as I do, and only a few situations where climatic conditions will allow this method. My Dahlias are not lifted until February (think of it), allowing the tuber to come to full maturity, not as to size, but in substance. A tuber full of life and energy, ready to give forth its best the first season. A comparison will prove my assertion.

As to prices: They are as low as first-class stock can be sold for to allow a legitimate profit to the grower. Why try to save a few cents, to be disappointed after you have nourished a plant for several months from some half-dead or shriveled-up tuber? Satisfied customers from all parts of the world write me year after year of the wonderful results of my stock.

I exercise every care to ship only first-class stock, but give no warrant, expressed or implied, and will not be responsible for the results of planting.

I will gladly make replacement or refund purchase price of any bulb or tuber that does not prove true to name or does not arrive in growing condition.

TERMS: Cash with order. All orders prepaid, and filled in proper time for planting.

I do not substitute unless directed to do so. If a mistake should happen—and I am only human—tell me, not your neighbor. I'll appreciate it.

To those that are unacquainted with the different classes and varieties of Dahlias, I would suggest that you leave the selection to me. Send the amount of money you wish to expend and, in appreciation of your confidence, I will treat you liberally as to quantity and quality.

Please write your name and address plainly.

I would appreciate the names and addresses of your friends interested in Dahlias and Gladiolus.

Dahlia Seed

I make a specialty of Dahlia Seed, gathered from a selected collection of the world’s best Dahlias, planted separate and apart from my general display for seed purposes.

Our long growing season and rainless summers make it possible to fully mature and ripen even our full decorative varieties on the bush, something extremely difficult in sections where it is raining during the time seed should set.

While I have doubled my planting each year, I have never been able to fill fifty per cent of the orders received, and would advise early ordering if you wish any. Seed per package................. 100 seed, $1.00 500 seed, $4.50 1000 seed, $7.50

If you are a grower or lover of the Dahlia, Gladiolus, Peony, Iris and Rose, you cannot afford to be without “The Flower Grower,” published monthly by Madison Cooper, Calcium, New York. It is the leading floral magazine, and is full of information.
Pom Pom Dahlias

This collection consists of the best from England. Each variety is perfect in form and size for exhibition purposes. For cut flowers they will last five days in the home.
